**Cost Effective Technological Solutions  
for Food Processing**

**...for the Indian Industry !**

Vanmark, the company that developed the first commercial potato peeler, is a recognised leader in the manufacture of industrial food processing equipment throughout the world. Since 1954, Vanmark equipments have helped customers improve production, increase yield, reduce waste and achieve higher ROI. Vanmark's designs expertly and efficiently address any washing, peeling, cutting and in-process storage and transferring needs you have in the production line.

**PEEL, SCRUB, WASH, CUT, CONVEY**

TOMRA Food designs and manufactures sensor-based sorting machines and integrated post-harvest solutions for the food industry. TOMRA innovates the world's most advanced analytical technology and apply it to grading, optical sorting, and peeling solutions for a multitude of food applications, for fresh and processed food. TOMRA's sorting solutions work to boost capacity and availability, while increasing profit, food quality and food safety.

**SORTING, PEELING**

FAM focusses on the development of industrial cutting machines for the food industry. The company provide customers with the solutions they need for the cutting, slicing and dicing of fruit, vegetables & nuts, cheese, meat & poultry, fish, potato chips and French fries. FAM is known for its simplified & rugged construction and all machines are designed to deliver fast thorough cleaning.

**CUT, SLICE, DICE**

**RETORT PROCESSING**

At Ezma we have been designing, building and installing individual equipment and complete process lines for the food industry for over 40 years. We specialise in offering customers comprehensive solutions for the food sterilisation process. Our extensive experience, together with our customers' demands, has allowed us to specialise in the heat treatment of products and the automation of the sterilisation process, allowing us to offer a complete and innovative service for the sterilisation process.
